

Identified Needs	In 5-year plan?
Planning / Coordination / Information Sharing	
Advance planning to give growers adequate time for production	1d (5-year plan)
Development of annual plan to bridge supply / demand gaps	1c
Survey of grow-out needs for upcoming year (each spring)	2a
System for distributing partnership documents other than email/dropbox	1e (website)
Seed collection coordination, tracking, and information sharing (map)	5a
Field-app for data capture during seed collection	5c
Habitat-specific list of priority species that are common among partner orgs	2b
Plant salvage database	4b
Funding	
Discretionary pool of funds to stimulate needed grow-outs	6d (plant sale)
Sustainable support for coordinator position	?
Payment structure for grow outs that shares risks	1a (MOU)
Grower Support	
Mechanism for upfront payment for grow outs	3a
Less erratic demand for plants	Obj. 2 & 3
Grower access to a good labor force	?
Connect public to growers while reducing the burden of small orders	6d (plant sale)
More local demand for plants	?
Higher profit margin for native plant production	?
Bulk Seed / Seed Collection	
Access to small-lot seed increase contracting	?
Streamlined seed collection contracting	5a
Post-fire seed mixes with locally sourced grasses	?
Labor support for weeding forb seed-increase beds	?
New seed-increase focused local growers	?
Volunteer-based seed collection blitz events	5b
Seed increase efficiency must be balanced with genetic specificity	6a
Container Stock / Riparian Species	
Coordination of container hold-over for delayed plantings	? Greenleaf?
Riparian species seed collection contracting and seed blitz events	5b
Technical Support	
Guidance on selecting genetically appropriate plant materials	6a
Rogue Basin-specific native plant propagation protocols	6b
Seed collection protocols	6a / ?
Facilities / Events / Public Outreach	
Public access to appropriate container plants for pollinator gardens etc.	6d (plant sale)
Seed storage facility	?
Container plant hold-over facility	Greenleaf?
Seed cleaning equipment	?
Local small-lot seed increase growers	?
Container plant production facility / scale up existing facilities	?
