ROGUE NATIVE PLANT PARTNERSHIP

MEMORANDUM OF UNDERSTANDING

Preamble

BACKGROUND
The Rogue Native Plant Partnership was first conceived in August of 2016 by local representatives from The Nature Conservancy, The Freshwater Trust, the Bureau of Land Management, Lomakatsi Restoration Project, the United States Forest Service, and the Oregon Department of Transportation. This cross-partner collaboration was driven by the need for a reliable and sustainable supply of native plant materials in the Rogue Basin to support restoration projects, greater emphasis on proactive planning for plant and seed needs, and greater collaboration and information sharing among local stakeholders.

With the goal of effective collaboration in mind, the Bureau of Land Management and Oregon State Parks provided funding for an interim coordinator position while the group worked to secure a more stable funding source for partnership activities and coordination. In December 2016, the Rogue Basin Partnership agreed to host the partnership website and serve as the fiscal agent for a proposal that would fund a part-time coordinator position for several years through the Bureau of Land Management, Medford District. The funding proposal was eventually approved and the interim coordinator (Kathryn Prive) continued to coordinate the group on a part-time basis. Soon after receiving Bureau of Land Management funding for the Rogue Native Plant Partnership coordination, the United States Forest Service, Klamath Siskiyou National Forest provided the Rogue Native Plant Partnership with additional funds for wildland seed collection, seed cleaning equipment, grow-outs, and project coordination.

The Rogue Native Plant Partnership’s many achievements are a testament to the dedication and vision of its founding partners. The combination of a growing ethic of collaboration among an increasingly diverse partner base, funding for group coordination and activities from the Bureau of Land Management and United States Forest Service, and fiscal sponsorship and technical support from Rogue Basin Partnership has allowed the Rogue Native Plant Partnership to become what it is today.

With admiration and appreciation,

A. INTRODUCTION:
The Rogue Basin has a variety of habitats that comprise a unique community of native plant species and ecosystem functions that need restoration. Despite the growing need for native plant materials, the barriers to increasing the local production of native plant species are numerous. The planning and coordination required to successfully source and produce appropriate native plant materials is complex and time-consuming. Native plant production presents unique challenges to growers. The grow-out phase often requires a multi-year commitment from growers and a willingness to experiment with propagation protocols for new species. This can be problematic because many agencies see year-to-year fluctuations in their budgets and severe fire and flooding events make multi-year planning difficult. These challenges often make it difficult for growers to develop a stable business strategy and may also deter new farms from expanding into the native plant production arena.

Since August 2016, a diverse group of agencies, private growers, and other individuals and organizations in the Rogue Basin have been working together to better meet the growing need for native plant materials in the region. The group aims to simplify the native plant procurement process for its partner organizations by coordinating native plant inventories, seed collection efforts and grower contracting.
B. PURPOSE:
The purpose of this Memorandum of Understanding (MOU) is to formalize the cooperative effort among the Rogue Native Plant Partnership’s member organizations and meet the following goals:

1. Facilitate a sustainable and reliable supply of native plant materials to federal and state agencies as well as local non-governmental organizations and the public
2. Streamline the native plant materials procurement process by centralizing seed collection efforts and grow-out contracting among partner organizations
3. Increase diversity and genetic appropriateness of locally-available native plant materials
4. Provide technical and financial support to local native plant producers

C. MUTUAL BENEFIT:
All parties to the MOU agree that it is to their mutual interest and benefit to work cooperatively in coordinating efforts to improve plant material availability and lower costs across jurisdictional and ownership boundaries within the Rogue Basin. All parties also agree it is to their mutual benefit to work cooperatively to educate, train, and share technology and information with agency and general public personnel about native plant materials, and to work cooperatively to make the best use of available resources to increase the use of genetically appropriate native plant materials within the Rogue Basin. By working cooperatively, including sharing information and technical expertise, any actions taken by an individual party may leverage the efforts of other partners and increase the total benefit to all parties.

D. IT IS MUTUALLY AGREED AND UNDERSTOOD BY ALL PARTIES THAT:

1. This MOU formally establishes the Rogue Native Plant Partnership (RNPP or Partnership) which serves the geographic area of the Rogue Basin, defined as all lands draining to the Rogue River. In time, the RNPP may expand to include habitats adjacent to this region, if approved by current members of the partnership.

   1. Each party will appoint at least one representative to participate in the RNPP. This group will meet twice a year to review progress, adopt steering committee recommendations, and identify and adjust future Partnership activities, funding needs, and opportunities.

   2. The RNPP will establish a permanent Steering Committee, whose members shall be volunteers from among the partners. This group will meet at least three times per year to identify funding needs and strategies, and to review progress and next steps. Members of the Steering Committee will select a Chair or Co-Chair at the first meeting of each calendar year. The Steering Committee may adopt rules for the selection process.

   3. The parties to this MOU will cooperatively prepare a 5-year Strategic Plan to describe the goals, objectives and strategies of the RNPP. The Strategic Plan will also outline the structure and functioning of the Partnership and provide any other needed background information. As deemed necessary by the Steering Committee, the RNPP shall engage in other cooperative planning efforts. Absent any separate agreement among one or more parties, each party is solely responsible for its own costs and participation in any cooperative planning effort.

2. Modifications of this MOU will be made by mutual consent of the parties, by the issuance of a written modification, signed and dated by all parties, prior to any changes being implemented.

   1. New parties may be added to the MOU by adding the signature of the individual or an organizational representative. Signatories of this MOU intend the Partnership to remain open and inclusive of all organizations and individuals who wish to work cooperatively on meeting native plant materials needs within the Rogue Basin.

   2. Any party may terminate their participation in this MOU at any time before the date of expiration by emailing notice to the RNPP coordinator, if one exists, or to the Chair or any Co-Chair of the Steering Committee.
3. This MOU in no way restricts the parties from participating in similar activities with other public or private agencies, organizations, and individuals.

4. This MOU is neither a fiscal nor a funds obligation document. Any endeavor involving reimbursement, contribution of resources, or transfer of anything of value between the parties to this MOU will be handled in accordance with applicable laws, regulations, and procedures including those for Government procurement and printing. Such endeavors will be outlined in separate agreements that shall be made in writing by representatives of the parties and shall be independently authorized by appropriate statutory authority. Specifically, this instrument does not establish authority for noncompetitive awards to the cooperators or contractor of any contract or other agreement. Any contract or agreement for training or other services must fully comply with all applicable competitive bidding requirements.

5. No legal binding agreement is hereby formed or intended. This MOU creates no legally enforceable rights, expectations, benefits, duties or responsibilities. No Federal Advisory Committee is hereby formed or intended. Each party is solely responsible for making its own decisions independently, and no party hereto is an agent for any other party under this agreement. Any binding agreement among two or more signatories to this MOU will be by separate agreement between those parties in accordance with the laws and regulations governing each individual party.

6. Any information furnished to Federal Agencies under this MOU is subject to the Freedom of Information Act (5 U.S.C. 552).

7. This MOU is executed as of the last date shown below and expires no later than December 31st, 2024 at which time it is subject to review and renewal or expiration.

E. AUTHORITY:
1. No party is delegating to any other party any decision-making authority. Each party will still be responsible for making decisions concerning land or resources within its jurisdiction.

2. The following is a listing of authorities that are applicable to this MOU: the Omnibus Consolidated Appropriations Act of 1997, Wyden Amendment (Public Law 104-208, Section 124, as amended, Public Law 105-277, Section 136); the Endangered Species Act of 1973, as amended (16 U.S.C. et seq.); the Fish and Wildlife Conservation and Water Resource Developments Coordination Act (PL 85-624); Oregon Revised Statute 541.388 which defines watershed councils; the Watershed Restoration and Enhancement Agreement Authority of FY 1999 and Beyond, Section 323 (a); Flood Control Acts of 1938, 1946, and 1950; Department of Defense Instruction 4000.19, Aug. 1995.

3. By the authority granted in Oregon Revised Statute (ORS) 190.110 and 283.110, state agencies may enter into agreements with units of local government or other state agencies for the performance of any or all functions and activities that a Party to the agreement, its officers, or agents have the authority to perform.
### F. ROLES & RESPONSIBILITIES:

<table>
<thead>
